

PRODUCT OVERVIEW

Tausight ePHI Security Intelligence™

Distributed care, virtual care and the need to share electronic patient health information (ePHI) are expanding healthcare's attack surface at an unprecedented pace. Tausight is healthcare's first AI-powered PHI Intelligence Platform, designed to give hospitals, health systems and healthcare providers insight into their ePHI risk.

 **Tausight**
AI-powered PHI Intelligence Platform™

Identify

Detect

Protect

Tausight uses a patented, healthcare AI model to provide unmatched visibility into ePHI location, movement and activity.

No deployment team needed

Reduce Risk, Liability & storage costs

Immediate time to value

24/7 Availability w/Cloud-based SaaS

CUSTOMER SPOTLIGHT

"Tausight has become the keystone of our cybersecurity and defense-in-depth strategy through a PHI Security Intelligence platform that leverages an AI-powered approach to detect, discover, and act on unstructured patient data wherever it exists in our digital care environment. As a result, we're seeing benefits such as minimized risk and ROI from reduced cyber insurance premiums."

-Aaron Miri, Senior Vice President and Chief Information and Chief Digital Officer, Baptist Health

PRODUCTS

Tausight for Servers

ePHI Location and Detection

ePHI insight across critical cloud and network infrastructure through an agentless executable. Upon downloading and running the Tausight PHI Locator, Tausight PHIL™, customers see real-time results within minutes.

Tausight for Endpoints

Live ePHI Surveillance at the edge

Expansive ePHI insight and ongoing surveillance deployed through a lightweight sensor across workstations, laptops and endpoints. Data insights include ePHI movement, deletion and suspicious activity.

ABOUT TAUSIGHT

Founded by healthcare security pioneer, David Ting, and led by healthcare visionary, Frank Nydam, Tausight is backed by top-tier healthcare investors, Polaris Partners, Flare Capital Partners, and .406 Ventures, and is based in Boston, Massachusetts.
